# Polypectomy Solutions

### POLYPECTOMY:

From a dynamic hot and cold snare with a coined distal tip to our clinically proven cold snare, we offer a product solution to accommodate a variety of needs.

## Polypectomy Solutions

### TABLE OF CONTENTS:

Product Name	Page Number
SmartBand® Endoscopic Mucosal Resection Kit	2
Endoscopic Marker	3
COINTIP™ Snare	4
HISTOLOCK™ Resection Device	4
EXACTO™ Cold Snare	5
LARIAT™ Snare	6
ASCENDO™ Submucosal Lifting Agent	6
ROTH NET™ Retrievers	7
eTrap™ Polyp Trap	8
REVEAL™ Distal Attachment Cap	8
Product Information Chart	9

### **SmartBand®**

### Endoscopic Mucosal Resection Kit

#### **SmartBand EMR Kit**

- The SmartBand EMR Kit is indicated for endoscopic mucosal resection in the upper GI tract. This device is intended for single use only.
  - Consists of a ligation handle with universal connector, loading device, flush tube, Pentax adaptor, barrel with 5 latex free bands, and the SmartSnare™ EMR Hexagonal Snare.

#### Key Features & Benefits...

- Offers a wide 360-degree visualization without the obstruction of bands
- Rotatable hex snare included
- Available in three barrel size options

View of Smartband® EMR Kit procedure in porcine model

### **Endoscopic Marker**

#### **Endoscopic Marker**

- The Endoscopic Marker is indicated for endoscopically marking lesions in the GI tract when the endoscopist anticipates the lesion will require surgical removal within 30 days.
- Provides a method of marking target tissue and lesions on the wall of a patient's stomach or colon during an endoscopic procedure. The mark provides a reference point for subsequent removal of the tissue.

#### Key Features & Benefits...

- No shake necessary Allows for stable suspension of the ink.
- Stable emulsion Does not migrate resulting in dark and permanent marks.
- Each syringe is prefilled Preparation is simplified with ready-to-use product. Each syringe comes with 5ml of the marking fluid.
- Sterile The product is single use and sterile.

### COINTIP<sup>™</sup> Snare / HISTOLOCK<sup>™</sup> Resection Device

#### **COINTIP Snare**

- The COINTIP Snare features a dynamic braided wire configuration with a coined distal tip supporting hot and cold cutting capabilities specifically for complex polypectomies like endoscopic mucosal resection.
  - Distal tip flattened to 0.010" which is achieved by the manufacturing process of "coining"
  - 0.016" snare loop wire supports grip of tissue to capture target
  - Catheter includes an internal strain relief for added support during resection to reduce buckling during tissue resection

Resection sites after use of the COINTIP™ Snare.

#### **HISTOLOCK Resection Device**

The HISTOLOCK Resection Device features a stiff monofilament wire to help recruit and resect flat tissue during complex polypectomy procedures.

The HISTOLOCK™ Resection Device effectively resects a flat 4cm rectal polyp with precision.

14mm snare size that offers maneuverability for controlled placement and precise resection

### **EXACTO™** Cold Snare

#### **EXACTO Cold Snare**

- Clinically proven to achieve a significantly higher rate of complete resection, the design of the EXACTO Cold Snare offers control and placement for a precise, clean cut when compared to traditional braided snares. 1,2
  - Enables a clean cut with a thin wire design (0.012"/0.30mm) while maintaining its shape and stiffness
  - Features a shield shape design that maximizes its width for control and placement
  - 9mm mini snare size that facilitates polyp tissue resection without the use of cautery
  - Offers a thin, stiff catheter that decreases buckling while aiding in placement

### **LARIAT™ Snare /**

### **ASCENDO™** Submucosal Lifting Agent

#### **LARIAT Snare**

The multi-functional design of the LARIAT Snare helps address a variety of resection needs including piecemeal resection and multiple polyps.

- Three distinct shapes with multiple sizes to reduce the need to exchange snares
- Snare loop design maintains its shape and integrity after multiple resections

#### **ASCENDO Submucosal Lifting Agent**

- ▶ The ASCENDO Submucosal Lifting Agent helps to clarify the area for visualizing the margins of the target lesion and performing the resection procedure. It is designed to provide a submucosal cushion of height and duration.
  - Prefilled Syringe Preparation is simplified with ready-to-use product

### **ROTH NET™ Retrievers**

#### **ROTH NET Retrievers**

- ▶ From capturing large polyps to securing multiple polyp fragments, the ROTH NET Retriever is a device you can count on for consistent performance. Our all-encompassing line of retrieval nets...
  - Preserve polyp fragments and specimens for histopathology
  - Allow for durability and continued visibility through the net
  - Opens even in retroflexed position

Retrieval of large polyp with ROTH NET™ Retriever

Retrieval of multiple polyps/ polyp fragments with ROTH NET™ Retriever

ROTH NET™ Retriever - select offering durability and strength across multiple passes

# eTrap<sup>®</sup> Polyp Trap / REVEAL<sup>®</sup> Distal Attachment Cap

#### eTrap Polyp Trap

- Allows for retrieval of multiple specimens, while safeguarding clinicians from unnecessary exposure to biomaterials.
  - Collect multiple polyps with uninterrupted suction
  - Simple transport and preservation of specimens
  - Magnifying window allows direct visualization of the collected specimen

### **REVEAL Attachment Cap**

- The REVEAL Distal Attachment Cap is designed to facilitate the endoscope's view during polypectomy procedures.
  - Helps avoid 'red out' by maintaining a constant distance between the endoscope and mucosa
  - Can be used with other polypectomy devices, including snares and needles
